

tion of lipid metabolism by Peroxisome proliferator-activated receptor alpha (PPARalpha)

PPARA activates gene expression

Netrin-1 signaling

PI Metabolism

Oncogenic MAPK signaling

Organelle biogenesis and maintenance

Signaling by Receptor Tyrosine Kinases

O-glycosylation of TSR domain-containing proteins

Cilium Assembly

Phospholipid metabolism

Defective B3GALTL causes Peters-plus syndrome (PpS)

Fcgamma receptor (FCGR) dependent phagocytosis

Neuronal System

Anchoring of the basal body to the plasma membrane

Laminin interactions

Transmission across Chemical Synapses

p.a
