

Certification Form – to be submitted with the manuscript

Modern Rheumatology

Prerequisites for Publication

The Editorial Board of Modern Rheumatology subscribes to recommendations formulated by the International Committee of Medical Journal Editors [<http://www.icmje.org>] regarding criteria for authorship. Accordingly, each person listed as an author or coauthor for a submitted report must meet all three of the following criteria.

An author or coauthor must have:

1. Conceived, planned, and performed the work leading to the report, or interpreted the evidence presented, or both.
2. Written the report or reviewed successive versions and shared in their revisions.
3. Approved the final version.

Meeting these criteria should provide each author with sufficient knowledge of and participation in the work that he or she can accept public responsibility for the report.

Authors should certify that no part of the work described has been published before (except in the form of an abstract or as part of a published lecture, review, or thesis) and that the work is not under consideration for publication elsewhere. If the inclusion of direct quotations, tables, or illustrations that have appeared in copyrighted material is absolutely necessary, they must be accompanied by written permission in English for their use from the authors and copyright holders.

Manuscripts submitted for publication must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted. Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 86-23, revised 1985), as well as specific national laws where applicable, were followed.

The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill these requirements.

Authors must disclose any financial or personal relationships that may pose conflicts of interest. In a submitted manuscript, all disclosures should be inserted by the author in the "Conflict of interest" section before the reference list.

Manuscript title:

Genome-wide DNA methylation patterns in CD4+ T cells from Chinese Han patients with
Rheumatological arthritis

Authors' names:

Dongyi He

I/We certify that the work submitted herewith is in full accordance with the conditions in the above "Prerequisites for publication".

Does the subject matter of this article involve any conflict of interest for you?
